Profile Summary

AIML engineering student with **experience as a Data Science Intern**, skilled in full-stack development, data analysis, and ML. Proficient in building end-to-end projects using Python, Django/Flask, and AI tools, with a strong focus on solving real-world problems.

Technical Skills

Adept at: Python, Data preprocessing, Statistics, ML modeling, RAG System, Backend development
Familiar with: JavaScript, Java, C, HTML, CSS
Libraries/Frameworks: Scikit-learn, Tensorflow, Pytorch, Streamlit, Flask, Django, node js
Databases/Tools: MySQL, MongoDB, Hadoop, Pyspark, VS Code, Excel, Tableau, Git, GitHub, Docker, AWS(EC2)
Soft Skills: Problem Solving, Analytical thinking, Time management

Experience

Data Science Intern **Sep 2025 – Dec 2025**

- Completed multiple ML projects including TCS stock price forecasting, bike price prediction, Netflix data analysis, and Twitter sentiment classification using Python, pandas, scikit-learn, and TensorFlow.
- Built and evaluated ML models end-to-end, achieved accuracy **91.46%** (stock price), accuracy **87.62%** (bike price), and **82.29%** accuracy on Twitter sentiment classification, outperforming baseline models.
- Performed structured data cleaning, feature engineering, EDA, model selection, and validation, created clear visualizations and insights for each project.
- Deployed ML models using Streamlit, and produced clean, reproducible Jupyter notebooks and GitHub repositories demonstrating the complete ML workflow.

Projects

Automotive data analysis platform | Python, Flask, React, Sklearn| *Source Code* **Live**

- Built a full-stack platform enabling non-technical users to upload datasets, view automated insights, generate interactive visualizations, and clean/prepare data without coding.
- Implemented one-click **preprocessing tools**, downloadable charts, and an intuitive UI that streamlined the entire data analysis workflow from upload → insights → visualization → export.

Virtual Interview Navigator |Django, HTML, CSS, JS | *Source Code* **Live**

- Built a full-stack using to help users practice and improve interview skills.
- Integrated the **OpenAI API** to generate real-time interview questions, answers, and personalized suggestions, creating an interactive, AI-driven interview preparation experience.

Career Guidance Platform | Flask, React, SQLite-alchemy | *Source Code*

- Built a full-stack Platform to recommend career paths and generate personalized roadmaps.
- Implemented a Q&A-based system to identify suitable career options and a roadmap module that creates step-by-step guidance with history tracking for user progress.

Education

Don Bosco Institute of Technology **2022–2026**
Bachelors Engineering in Artificial Intelligence and Machine Learning [7.98] Bengaluru, Karnataka

Certificates

Data quest hackathon, Cause 2025, Data Science and ML course, NPTEL python with DSA, udemy (python, c, full stack dev)
