Profile Summary

AIML engineer with experience as a Data Science and Software Development Intern, skilled in full-stack development, data analysis, and ML. Proficient in building high-performance end-to-end projects using Python (FastAPI/Flask), MERN stack, and AI tools, with a focus on scalable backend architectures and real-time application processing.

Technical Skills

- **Adept at:** Python, Backend Development, Data Preprocessing, ML Modeling, RAG Systems
- **Familiar with:** System Design, Methodologies and Languages such as JavaScript, Golang, Java, C, HTML, CSS
- **Libraries/Frameworks:** FastAPI, Flask, Django, React, Node.js, Express.js, Scikit-learn, TensorFlow, PyTorch, Streamlit
- **Databases/Tools:** PostgreSQL, MySQL, MongoDB, Redis, Hadoop, PySpark, Git, GitHub, Docker, WebSockets, REST APIs, AWS, Cloudinary, VS Code, Playwright, BullMQ, RabbitMQ
- **Soft Skills:** Problem Solving, Analytical Thinking, Time Management

Experience

Software Development Intern | Sumeru Digital Solutions Pvt. Ltd.

June 2026 – Present

- Developed an AI Resume Interview Platform using the MERN stack integrated with 15+ production REST APIs.
- Reduced interview queuing and processing times by 80–85% utilizing BullMQ services and WebSockets.
- Improved React dashboard rendering performance by 30% via memoization and lazy loading techniques.
- Secured sensitive API endpoints using JWT, HTTP-only cookies, and robust schema validation.
- Automated daily asynchronous content workflows using Playwright to handle 20 logs efficiently.

AI Intern | SR Innovative Technologies Pvt. Ltd.

Feb 2026 – Apr 2026

- Developed a Heart Stroke Risk Prediction pipeline using Python and Logistic Regression, achieving 99.89% validation accuracy.
- Performed end-to-end data preprocessing, feature selection, model training, testing, and evaluation on complex healthcare datasets.
- Created detailed technical presentations, architecture documentation, and engineering reports for deep project visibility.

Data Science Intern | Unified Mentor Pvt. Ltd.

Sep 2025 – Dec 2025

- Built and evaluated predictive ML models covering stock forecasting, bike price evaluation, Netflix trends, and Twitter sentiment using Scikit-learn and TensorFlow.
- Executed thorough exploratory data analysis (EDA), feature engineering, and cross-validation tracking.
- Deployed interactive Streamlit web apps, achieving 90%+ accurate performance on live forecasting metrics.

Projects

Automotive Data Analysis Platform | Python, Flask, React, Scikit-learn, Render | [Source Code](#) [Live](#)

- Architected a full-stack data platform enabling non-technical operators to seamlessly upload files, view automated insights, and build live charts.
- Implemented core asynchronous preprocessing scripts, downloadable SVG/PNG charts, and an intuitive UI to minimize raw user data preparation time.

Career Guidance Platform | Flask, React, PostgreSQL, JWT-Auth, SMTP | [Source Code](#)

- Engineered a full-stack responsive web application to dynamically recommend adaptive career roadmaps based on user input metrics.
- Developed a stateful assessment module parsing structured interactive paths with secure history tracking.

Education

Don Bosco Institute of Technology

2022 – 2026

Bachelor of Engineering in Artificial Intelligence and Machine Learning [GPA: 8.23] Bengaluru, Karnataka
